

Dimout Systems

This brochure contains colour illustrations and a summary specification for each of the systems in this product group to assist your clients in making their choice.

The comprehensive dim-out range incorporates over 20 years' specialist knowledge in the field. It comprises vertical/horizontal/sloping and multiple models. Whilst using a maximum of standard components, the range offers perhaps the widest choice in its field to meet exact requirements. The choice of headrails means for discreet systems in proportion to the window's dimensions.

Silent Gliss 4500 ▶
Spring operated with patented locking system.

With a small cassette headbox, the 4500 is particularly suited to small windows and door vision panels. The system can also be operated in inclined or horizontal positions up to 30°.

◀ Silent Gliss 4510
Chain operated system.

Also special double-sided chain operation for flyscreen doorways. The system can also be operated in inclined or horizontal positions up to 30°.

Silent Gliss 4540 ▶
Crank operated system.

Available with either fixed or detachable crank. The system can also be operated in inclined or horizontal positions up to 30°.

◀ Silent Gliss 4550
Electric operation by fixed switch or remote control.

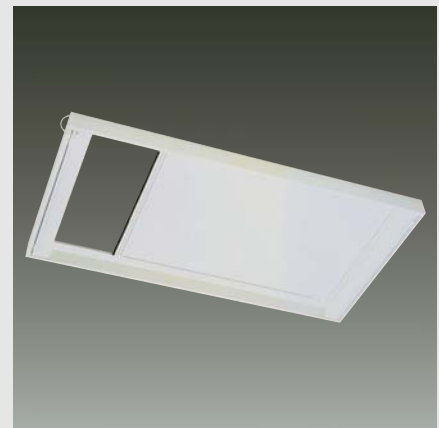

Banks of systems may be operated individually, simultaneously or both. The system can also be operated in inclined or horizontal positions up to 30°.

Silent Gliss 4590 - Crank operation ▶
Silent Gliss 4595 - Electric operation
For horizontal or sloping applications.

Skylighter systems are delivered pre-mounted in white or black aluminium frames. Adjustable side profiles are supplied in all cases.

◀ Silent Gliss 4560 - Chain operation
Silent Gliss 4570 - Crank operation
Silent Gliss 4580 - Electrical operation
Multiple dim-out systems.

These systems can cover up to four windows using only one operating mechanism (chain / crank / electric). Normally supplied with adjustable side profiles.
