

Electrically Operated Curtain Track Systems

This brochure contains colour illustrations and a summary specification for each of the systems in this product group to assist your clients in making their choice.

Silent Gliss has developed the widest, most efficient and reliable range of electrically operated curtain track systems – purpose designed for conference rooms, theatres, stages and auditoriums as well as for all domestic and contract locations.

**Silent Gliss Autoglide 5070, 5080, 5080AR ▶
For light to medium weight domestic use only.**

White profile, easy wall or ceiling mounted, delivered ready to fit. Maximum length is 5m with a maximum curtain weight of 15kg. No pre-wiring necessary. Cannot be bent. Choice of operating methods – via the Dawn and Dusk sensor (5070), which opens the curtains in the morning and closes them at night, using a Timer Unit (5080) which allows pre-programming of opening and closing times, or, by Remote Control (5080AR) which has a remote control handset as well as the Timer Unit.

Autoglide is supplied made-to-measure and cannot be cut down at a later date.

**◀ Silent Gliss 5100
