

METROPOLE

Redefining poles

What differentiates Metropole from a traditional curtain pole? Metropole features an internal gliding channel, avoiding the need for curtain rings, giving the appearance of a pole but the ease and usability of a track.

Whether motorised or hand operated, Metropole aligns precision engineering with considered design for a pole that performs as well as it looks. From the unique two-component glider to the seamless finial connection, each element is carefully designed to deliver something remarkable.

Offered in 4 round pole diameters (23, 30, 38 and 50mm), and a rectangular profile (36mm), Metropole is available hand, cord or motorised.

38mm Metropole in antique bronze with Ellipse finials. Wall fitted with Fillet brackets. Wave curtain using Oscurante.

“Good Design Is Often Invisible”

Dieter Rams

38mm Metropole in black with flush endcaps.
Fitted with ceiling supports. Wave curtain using Leviso Light
and a single-pleat curtain using Someo.

38mm motorised Metropole in black with flush endcaps. Fitted with ceiling supports.

OPERATION

Metropole – motorised

A new era in motorised curtain poles. Motorised Metropole combines the visual elegance of a decorative curtain pole with the performance of advanced motorisation for smooth, silent and powerful operation.

The elegant 38mm profile is available in 13 colours and complemented by a collection of endcaps and finials to suit both contemporary and traditional interiors.

Choose from a range of intuitive control options, including wall switches, handsets, app and smart home integration.

38mm motorised Metropole in antique bronze with Ellipse finials. Wall fitted with Fillet brackets. Wave curtain using Oscurante.

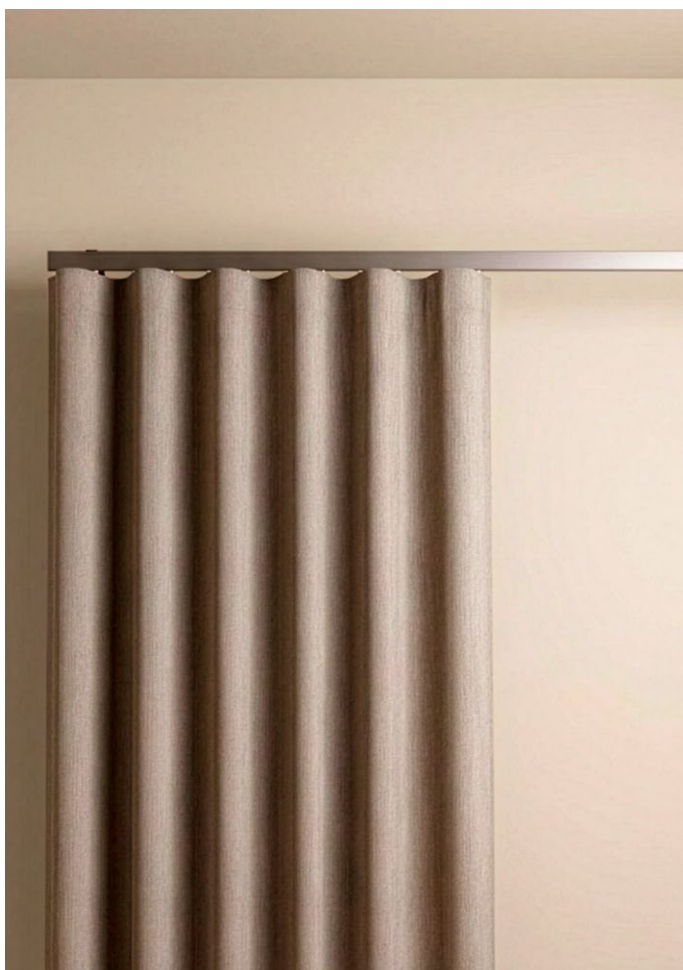

36mm rectangular pole in white with flush endcaps. Fitted with ceiling supports. Wave curtain using Someo.

OPERATION

Metropole – manual

Hand and cord-operated Metropole allow curtains to be opened and closed with the slightest touch, with unique two-component gliders ensuring smooth and silent movement.

Hand operation offers the simplest solution for beautiful curtain hanging. Cord-operated poles offer the same elegant result while eliminating the need to touch the fabric.

Wave curtain using Ocurante.

KERRY JOYCE THE INTANGIBLE
AD at 100

“It was important that the finial and the pole truly spoke to one another, with shapes that ‘emerged’ from the pole in a continuous form. The Taper finial was born from this process - and then this language was applied across a collection which would include more traditionally popular shapes such as the classic Ball and Spear.”

Nadine Hadden, Designer

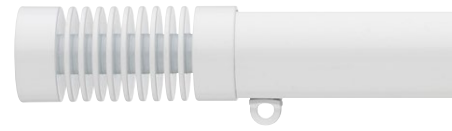

Finials and endcaps

Metropole's refined selection of finials and endcaps works equally well in contemporary and traditional homes. The perfectly understated Taper and the striking Ellipse finials lend themselves to contemporary settings, with a fluted design that complements a range of architectural interiors.

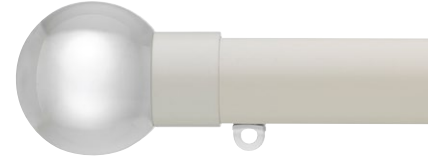

No longer a pastiche of the finial as a 'curtain-stopper,' they offer an aesthetic fit for 21st century décor. For heritage interiors, a range of traditional finial designs creates a natural union with period homes. For a more pared-down look, endcaps are an alternative finish to finials. Flush and Stud endcaps are available across all shapes and sizes of pole. The Design endcap is available for round poles.

Black gliders are standard for black and charcoal poles. Other colours are supplied with white gliders unless otherwise requested.

COLOURS

From light to dark

From striking metallics to muted and neutral shades, Metropole offers something to suit any colour scheme.

Darker pole colours can frame a window, while lighter shades create a softer, more blended look. Finials and brackets are colour matched to the pole.

30mm Metropole in charcoal with Spear finials. Wall fitted with Square Smart Fix brackets. Wave curtain using Polyflax.

BENDING

Curves

Every pole and curtain is made-to-measure, tailored to your exact specification. All poles can be forward and reverse bent to fit perfectly to bay windows or other curved applications.

ceiling fitted with top fix brackets.

30mm Metropole in black with Ellipse finials. Wall fitted with Fillet brackets. Wave curtain using Colorama 2.

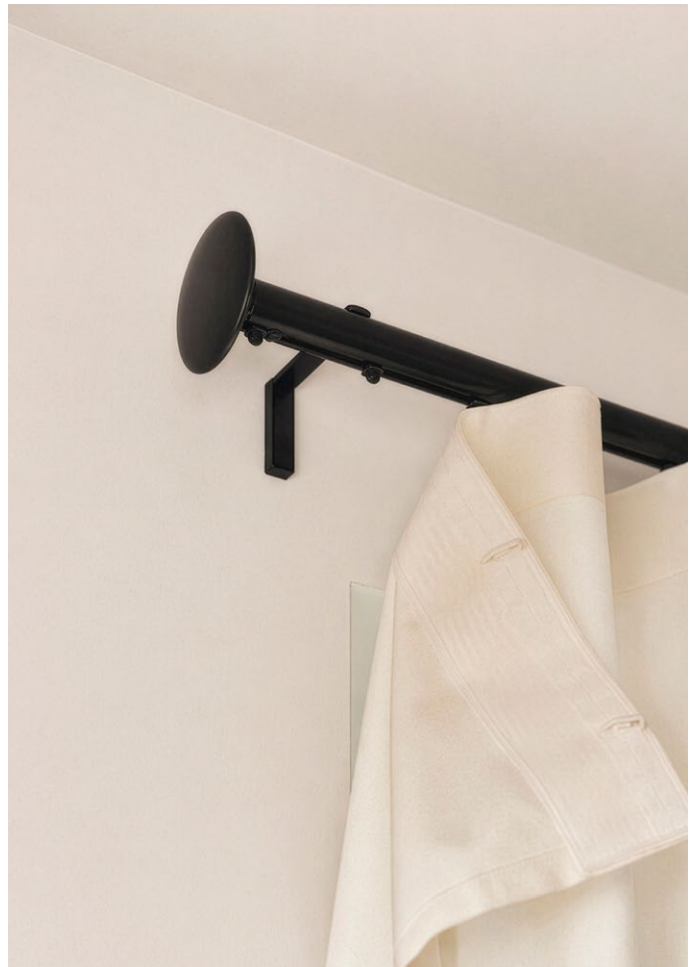

Fillet brackets with magnetic covers.

Brackets

Metropole includes a wide range of brackets for wall and ceiling fitting, with solutions to accommodate finials and deep curtain headings.

Smart Fix brackets offer a modern, versatile design and include magnetic metal covers to hide the screws. Square Smart Fix brackets, with a narrower depth are perfect when fitting space is limited.

CHOOSE YOUR POLE SIZE AND COLOUR

Metropole is available in 15 colours across the range of sizes and shapes of pole.

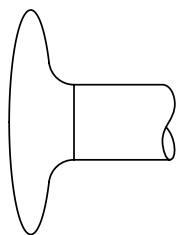

Ø23mm	Ø30mm	Ø38mm	Ø50mm	36mm
White	White	White	White	White
Matt White	Matt White	Matt White	Matt White	Matt White

CHOOSE YOUR OPERATION

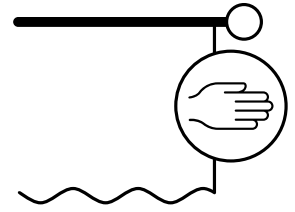

Motorised

38mm pole up to 6m long and 45kg in weight. Wide range of control options, including wall switch, remote, and home automation systems.

Cord

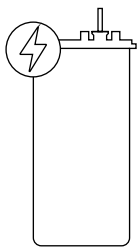

30mm and 50mm poles up to 6m long and 13kg in weight. Optional intermediate pulley is available to cord the pole at both ends for individual curtain operation, longer poles or heavier curtains.

Hand

23, 30 and 50mm round poles and 36mm rectangular profile.

MOTOR AND CONTROL OPTIONS

SG 9060 Motor

- Motor mounted directly to the pole.
- Soft start and stop delivering smooth and silent movement.
- Touch & Go sets the curtain in motion with the slightest touch.
- Manual override ensures operation during a power failure.

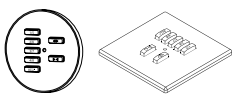

Controls

Supplied as standard with 100-240V AC supply or Dry Contact. Alternatively, choose one of the Silent Gliss control options.

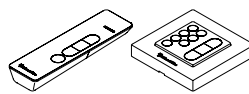

SG Control R

Radio handsets and wall switches. Single or multi-channel, available in a range of finishes.

SG Control N

Radio handsets and wall switches. Single or multi-channel.

SG Smart

Integrate into building control system.

Move App

Control groups or rooms through our app. Home hub required.

Matter

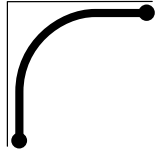

Control directly through a Matter-enabled device.

CHOOSE YOUR POLE SHAPE

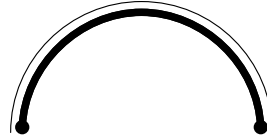

Metropole can be forward and reverse bent to accommodate bay windows and curved installations.

Showing reverse bend

The following minimum bending radii apply:

- 23mm hand operated system, 15cm
- 30mm hand operated system, 25cm
- 30mm cord operated system, 30cm
- 36mm hand operated system, 20cm
- 38mm motorised system, 35cm
- 50mm hand operated system, 50cm
- 50mm cord operated system, 68cm

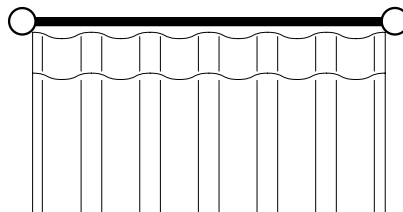

CHOOSE YOUR GLIDER

Metropole is suited to all curtain headings using curtain hooks including traditional pleats, Wave and the unique Swiss Pleat only from Silent Gliss. All gliders are manufactured using 2 components - a soft component to reduce noise and a hard component for stability. It is important to establish the curtain heading at the point of ordering to ensure the correct glider is used.

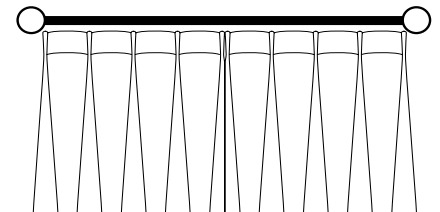

2C Glider

For traditional pleated or goblet headings the Silent Gliss two-component glider provides optimum gliding properties.

Wave 2C Glider or Roller Cord

Wave offers a more contemporary look throughout the curtain drop: when opened, the curtains stack back neatly, and when closed the fabric hangs in a smooth, continuous wave.

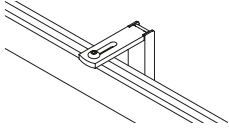

Swiss Pleat 2C Glider

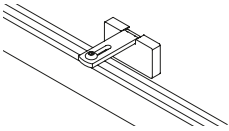

The Swiss Pleat is a unique curtain heading only available from Silent Gliss using fabrics from The Collection. Using bespoke high-performance gliders sewn into the curtain, it is an understated alternative to traditional curtain headings.

CHOOSE YOUR BRACKET

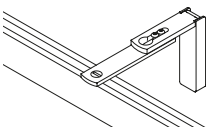

Metropole offers a range of brackets, colour matched to the pole for wall or ceiling fitting.

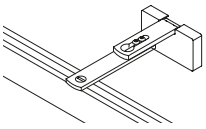

Smart Fix Brackets offer the ultimate flexibility and ease of installation. Modern and versatile with a magnetic cover, they are offered as standard on all straight Metropoles unless otherwise specified.

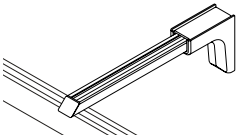

Square Smart Fix Brackets have the added advantage of a smaller down-stand which makes them ideal when fitting space is limited or for minimal visibility of the bracket.

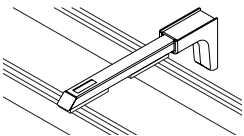

Adjustable Smart Fix Brackets accommodate challenging fitting situations. They are supplied as standard with all bent poles.

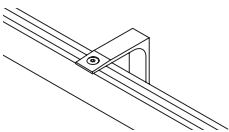

Adjustable Square Smart Fix Brackets are an alternative adjustable bracket with a smaller down-stand for restricted fitting spaces or minimal bracket visibility.

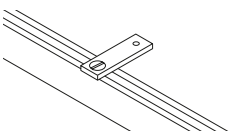

Adjustable Universal Smart Fix Brackets with a single pole offer a longer extension to clear obstacles.

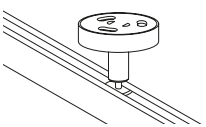

Adjustable Universal Smart Fix Brackets with a double pole are ideal for layered curtains.

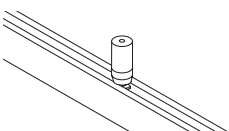

Fillet Brackets offer a contemporary alternative wall fitting solution. Sleek lines flow into a tapered finish, completed with a magnetic screw cover. Recommended for straight poles only.

Ceiling Supports are suitable for fixing flush to a ceiling or window reveal. Offered in 2 sizes - 3mm and 9mm to accommodate flush and stud endcaps for all poles sizes.

Top Fix Brackets allow finials to be specified on ceiling fitted poles.

Ceiling Hangers are an alternative bracket for ceiling fitted poles.

The Architects of Silence

Silent Gliss is the leading global supplier of premium interior window treatments. Since 1952 we have been tirelessly committed to the development of the world's smoothest, quietest systems using state of the art technology.

Driven by customer needs, Silent Gliss offers functional and durable products. Expert technical advice coupled with installation and support services complete the offer. Silent Gliss stands for innovative, sustainable, tailor made solutions, exceptional design and first-class quality.
